

Eagle™ Pedevator 2™ multi system configuration using Eagle PT-250 pan tilt head with Hitachi Z4000w camera, Eagle PT-C55 system controller, Eagle PT-PS-3 power supply, and Eagle PT-T2 junction box.

Note that addresses of Pedevators must be set using software commands from PT-C55 controller. Addresses of PT-250 heads should be set using the DIP switch module inside the back of the head as per manual. Power from PT-PS-3 is enough only for one PT-250/Pedevator 2 combo.
